ABOUT ME

Final-year B.Tech Computer Science student with strength in Full - stack development and applied AI/ML . Co-authored and Authored peer reviewed research presented at IEEE CIS and AIP Conference in Cybersecurity and Data Mining . Hands - on experience building AI-enabled web applications using React , Flask and Python . Seeking Full time Software Engineer / Full-stack / AI Engineer opportunities .

EDUCATION

Dronacharya Group Of Institution , Greater Noida , India

Bachelor Of Technology (B.Tech) , Computer Science | 2023-2027

PROJECTS

Zenvyx - AI Powered resume intelligence and career simulation platform

[View Source Code](#)

- Built an AI-powered resume intelligence platform that uses PyPDF2 to parse uploads, extract technical skills, and provide automated ATS compatibility scoring.
- Used React and Tailwind CSS to construct a clean workspace visualizing dynamic skill gaps, scoring metrics, and actionable career advancement roadmaps.

WayzUp - GIS-Based Community Hazard Alert System

[View Source Code](#)

- A lightweight, storage-free full-stack mini project enabling users to report and view local road hazards via geo-tagged photos.
- Frontend: React, Vite, Tailwind CSS, React Router, React Toastify, @react-google-maps/api
- Backend: Python Flask, Pillow (PIL) for EXIF GPS extraction, CORS

RESEARCH & PUBLICATION

Co - Author | Customer Segmentation For Market Analysis using data Mining

ICOTET 2024 (AIP Conference Proceedings) | [Google Scholar](#)

Main Author | Synergy Of Blockchain And Artificial Intelligence For Adaptive Cybersecurity : A Decentralized Intelligence Framework

IC-AIDA 2026 , IEEE CIS , Presented - 10 April 2026

TECHNICAL SKILLS

- Programming Languages : Python , Java
- Machine Learning / AI : Machine Learning Fundamentals
- Web Development :
- Frontend : HTML5 , Tailwind CSS , Javascript , React
- Backend : Node.js
- Tools & Library : Git , GitHub , VS Code , OpenCV , Tkinter
- DataBases : SQLite3 , Mongo DB , My SQL
